

S I S T E M I A V I O N I C I

Since 1962 LOGIC has been studying, developing, manufacturing and selling Aeronautical Equipment.

Benefiting from decades of experience and familiarity with the latest technologies, LOGIC not only meets requirements but achieves standards of excellence.

Highly professional engineering skills and techniques ensure the highest levels of performance are achieved throughout all phases of the project: Design, Development, Qualification, Production and In-Service Support.

LOGIC's flexibility in tailoring solutions to the needs of the Customer has generated a wide range of equipment for the various families of products.

LOGIC has Qualified Supplier status with the world's major manufacturers of fixed and rotary wings aircraft.

DISPLAYS & CONTROLS

Our Cockpit Instrumentation ranges from display units to memory card interfaces and multi-function panels.

Meeting the most stringent requirements, Logic also pays particular attention to ergonomics.

High-resolution display units and embedded processors guarantee accurate graphics.

Internal data storage ensures extensive data logs are readily available for both on-board operations as well as after-flight data evaluation and post-processing.

MAIN FEATURES

AMLCD display with high level graphic performance and proprietary ruggedization process;

NVG compatibility;

Multiple data link support (1553Bus, Arinc 429, USB, CAN BUS, Ethernet, Wireless).

EQUIPMENT

- Get Home Displays
- Radio Control Units
- Engine Fuel Display Panels
- Weapon Control Panels
- Advisory Panels
- Cannon Control Units
- Release Control Panels

Our systems fly on:

- ALENIAAERMACCHI M346
- AIRBUS HELICOPTERS SUPERPUMA MKII⁺
- HINDUSTAN - ALH
- NHI - NH90
- PILATUS - PC7 / PC9 / PC12

OUR IDEAS FLY ALL OVER THE WORLD
