

## ENVIRONMENTAL POLICY OF LOGIC SPA

Logic spa is an Italian company founded in 1962 which has been designing and manufacturing electronic equipment for application in both civil and military avionics for more than 50 years.

Logic undertakes to integrate environmental protection into daily work and to achieve its corporate objectives by operating according to environmentally sustainable practices and by carrying out concrete actions for the prevention of pollution.

For this reason, Logic spa is committed to developing and maintaining an Environmental Management System compliant with the international technical standard UNI EN ISO 14001: 2015, applying it to the following activities:

- *Research, design, development, manufacture, maintenance and overhaul of aeronautical equipment / military and civil use*
- *Development and maintenance of embedded software for aeronautical equipment applications for military and civil use*

### Environmental policies

1. Compliance with Local, Provincial and National legislation in environmental matters.
2. Continuous effort to improve actions to prevent air pollution and its origin, wherever possible.
3. Continuous commitment to improve the management of waste produced in the Company.
4. Continuous commitment to improve the management of chemicals used in its own processes from which negative environmental impacts can result.
5. Commitment to reduce our consumption of energy and materials in order to minimise the environmental impact associated with our products and activities.
6. Informing and sensitising our employees in order that Environmental Protection becomes everyone's responsibility.
7. Commitment to reducing actions harmful to the environment through the environmental control of structures, plants and substances and the reduction of hazardous chemicals, as far as is technically possible.

The Logic spa Environmental Policy is available to the public and disseminated internally to its employees.

### Purposes and Objectives

Logic aims to reduce the environmental impact caused by its processes, through the implementation of specific Environmental objectives, with particular reference to a correct management of waste, to a reduction in energy consumption, to design and production choices that allow to reduce to the minimum possible the use of dangerous chemical substances.

Logic SpA also undertakes to constantly measure its environmental performance through the defined indicators.
